“The MDCCMA was established in 1965 to bring together local government professional administrators to stimulate the highest standard of public service and administration and to promote good fellowship and intergovernmental relationships. The primary objectives of the Association are to participate as an organization in community problem solving, to advocate the principles, standards and Code of Ethics of the International City County Management Association, and to actively influence and participate in the Florida City and County Management Association activities.”

We at the MDCLC are proud to work with this organization for the benefit of our municipalities.
